# РГЗ. Часть 5.

Создание основного меню приложения.

Основное меню приложение было разработано на основе изначальной модели классов с некоторыми доработками. Основные классы слоя Model были созданы с помощью специального расширения для проектов C# - Microsoft.EntityFrameworkCore.Sqlite.

На основе класса-контекста и классов представлений отношений бд были созданы классы для отображение и взаимодействия с базой данных.

Результаты работы приложения:
